- Transmitter's Battery Life: Up to 9 hours

General Specifications

- Designed for most Android devices with USB-C ports, it is a dual-channel wireless system featuring 2 transmitters & 1 receiver
- Ultra-compact & lightweight: Compact, lightweight, convenient to carry, with a transmitter weight of 0.09 kg as well as a receiver weight of 0.006 kg
- : It's easy to use, just plug in the receiver to start recording immediately
- Just plug in the receiver, just plug in the receiver and start charging the phone: During recording, if your device needs charging, plug it into the USB-C port on the side of the receiver
- : Charging during recording is particularly suitable for long recording sessions, such as streaming, recording courses
- Noise cancellation improves sound quality: Ideal for both conventional recording environments and noisy environments
- : The NR button on the transmitter activates the noise reduction function, filtering out most ambient noise and giving you only clean sound
- Long battery life: The transmitter can operate continuously for 9 hours after a full charge
- : The receiver does not need charging, eliminating the hassle of stopping recording to charge the device
